

TUBE DECK SETTLER MEDIA

PVC Inclined Plate / Tube Settler Media • Tongue & Groove Fitting

High-efficiency PVC tube deck media that dramatically increases the effective settling area within clarifiers and settling tanks — improving suspended-solids removal without increasing tank footprint.

KEY FEATURES

- ❑ Increases effective settling area many times over within the same tank volume
- ❑ Lightweight, corrosion-resistant PVC construction — unaffected by most chemicals
- ❑ Tongue & groove fitting for quick, secure modular assembly on site
- ❑ Available in 60° and 50° slope configurations for different flow/loading needs
- ❑ Self-cleaning inclined design promotes sludge to slide down for easy removal
- ❑ Suitable for clarifiers, settling tanks, and lamella / tube settler retrofits

TECHNICAL SPECIFICATION

Plan Settling Area (60° Slope)	11 m ² / m ³
Plan Settling Area (50° Slope)	13 m ² / m ³
Cross Sectional Area	120 mm x 44 mm
Material of Construction / Colour	PVC / Black
Hydraulic Radius	15 mm
Thickness	1 mm ± 0.01 mm
Fitting Arrangement	Tongue & Groove
Max. Continuous Operating Temperature	55° C

TYPICAL APPLICATIONS

- ❑ Water Treatment Plants (WTP) — clarifier upgradation & retrofits
- ❑ Sewage & Effluent Treatment Plants (STP / ETP) — secondary clarifiers
- ❑ Industrial process water clarification
- ❑ New clarifier design where reduced footprint is required
